[27-05-2023] Tools

(<https://pypi.org/project/refextract/>)

(<https://docs.readme.com/rdmd/docs/getting-started>)

ORCID: reference use of the latex package “orcidlink”.

Idea for backlog: obtain keywords via orcid api (python) and build wordcloud.

[26-05-2024 / day08] Include Academicons

[quarto extention](#)

Potentially add google scholar link to author index

Possibly also use [fontawesome computer icons](#)

Look into [interactive-sql](#) which may help to clarify relationships between accounts and “verdichtingen”. Note that interactive-sql is a wrapper around [sqlime](#).

Document attributes

Current thinking: use latex package

-
-

In case of output to html, and not to loose functionality of certain latex packages (such as orcid):

- Document is processed and variables obtain a number.
