Objective for this second sprint:

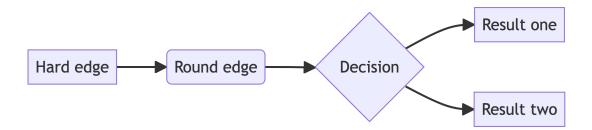

- Description of finding labels for literature
- Description of Design Science (prof Twente youtube die ook op seminar in Amsterdam was)
- Description of DMAIC method, selectic projecten
- Description of Python Measurement tool

Furthermore I want to go back to sprint 1 to "fix things". Specifically, I want to:

- take out some ideas and put these in a backlog (separate file).
- improve the structure such tthat the sprint is more around the topic "100 papers" (even if I selected only 25)

Already the above seems like a lot for a 14 day sprint. Let's see where we'll get ...

The paper recommended to my by email (per her email of): Design Science in Information Systems Research (Hevner et al. 2004). Indeed, in this write-up there are several papers where the Design Science method is applied (Shafagatova and Van Looy 2021), ... (to be continued).
